West Gulf River Forecast Center River Recreation Forecast

May 12, 2009

The WGRFC Area

WGRFC is one of 13 NWS River Forecast Centers that provide precipitation and river forecasts for the Continental U.S. and Alaska. WGRFC's area of responsibility extends into Mexico in order to cover tributary rivers that flow into the Rio Grande.

WGRFC Forecast Types

- **Flood Only Forecasts** - Begin issuance when location is forecast to rise above a “criteria” level. Forecasts are updated until level drops below criteria. This includes the majority of WGRFC forecast points
- **Daily Forecasts** – Issued every morning regardless of flow
- **Recreation Forecasts** – Issued weekly on Wednesday afternoon for upcoming weekend flows.
 - Presidio
 - Boquillas (Rio Grande Village)

River Recreation Advisory

- Product originated in the late 1970s.
- Collaborative project between the Texas Parks and Wildlife and the NWS River Forecast Center.
- TPWD provided floatability levels for river recreation locations across the state.
- RFC produces hydrologic forecast and creates the forecast product.

River Recreation Advisory

- Forecast is created weekly every Wednesday afternoon.
- Daily flow and floatability are forecast for Fri-Sun, and through Mon for three day weekends.
- Projected reservoir releases are provided by Dam operators.
- Runoff and upstream flows are routed using RFC's operational hydrologic model.

River Recreation Advisory Forecast Group

Updated 2 May 2008

Floatability Levels

#	Below minimum
1	Minimum water available for floating, some portaging or lining through shallows necessary
2	Satisfactory water conditions, no lining necessary
3	Ideal water conditions for floating
4	Water level approaching hazardous conditions
5	Maximum water flow - for experts only
F	River in flood

CAUTION: FLOW ESTIMATES ARE BASED ON RAINFALL AS OF 6 AM WEDNESDAY.
LOCALLY HEAVY RAINS AFTER RELEASE OF THIS ADVISORY CAN GREATLY CHANGE
THE FORECAST RIVER CONDITIONS. ESTIMATES OF DISCHARGES FROM RESERVOIRS
ARE SUBJECT TO POWER AND WATER SUPPLY RELEASES AND FLOOD CONTROL
REGULATIONS. CHECK THE LATEST WEATHER FORECAST AND BE PREPARED FOR
CHANGES IN FLOW AND FOR FLASH FLOODS.

KEY TO SUGGESTED FLOATABILITY LEVELS SUBJECT TO REVISION BY RIVER
RECREATION ASSOCIATION OF TEXAS AND TEXAS PARKS AND WILDLIFE
DEPARTMENT, 1978.

- #. RIVER BELOW MINIMUM.
- 1. MINIMUM WATER AVAILABLE FOR FLOATING. SOME PORTAGING OR LINING
THROUGH SHALLOW IS NECESSARY.
- 2. SATISFACTORY WATER CONDITIONS FOR FLOATING.
- 3. IDEAL WATER CONDITIONS FOR FLOATING.
- 4. WATER LEVEL APPROACHING HAZARDOUS CONDITIONS.
- 5. MAXIMUM WATER FLOWS FOR EXPERTS ONLY.
- F. RIVER IN FLOOD.
- NA. NOT AVAILABLE DUE TO INSUFFICIENT INFORMATION ON RIVER CONDITIONS.

River Recreation Advisory

- Product contains forecasts for approximately 30 recreation points across the state.
- Two Rio Grand Points are included in the forecast:
 - Presidio
 - Boquillas (Rio Grande Village)

River Recreation Advisory

- Forecast product is intended for public distribution
- Issued under the WMO header of FGUS84 KFWR and the NWS product id of FTWRVSFWR.
- Product is published in print media, and linked to from web pages.
